

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

THE  
AMERICAN NATURALIST,  
AN ILLUSTRATED MAGAZINE  
OF  
NATURAL HISTORY..

EDITED BY  
A. S. PACKARD, JR., AND EDWARD D. COPE.

ASSOCIATE EDITORS :  
W. N. LOCKINGTON, DEP. OF GEOGRAPHY AND TRAVELS.  
PROF. H. CARVILL LEWIS, DEPARTMENT OF MINERALOGY.  
PROF. C. E. BESSEY, DEPARTMENT OF BOTANY.  
PROF. C. V. RILEY, DEPARTMENT OF ENTOMOLOGY.  
PROF. O. T. MASON, DEPARTMENT OF ANTHROPOLOGY.  
PROF. HENRY SEWALL, DEPARTMENT OF PHYSIOLOGY.  
DR. C. O. WHITMAN, DEPARTMENT OF MICROSCOPY.

VOLUME XVII.

**PART SECOND.**

PHILADELPHIA :  
PRESS OF McCALLA & STAVELY,  
Nos. 237 AND 239 DOCK STREET.  
1883.

Copyrighted 1883,  
By MCCALLA & STAVELY,  
For the Proprietors.

# CONTENTS.

The Naturalist Brazilian Expedition. (Second Paper. — The Lower Jacuhy and Sao Jeronymo.) . . . . .	<i>Herbert H. Smith</i> . . . . .	707, 1037
Growth and Development . . . . .	<i>Charles Morris</i> . . . . .	717
Pearls and Pearl Fisheries. (Part II.—Marine Pearl Products.) (Continued from p. 587) . . . . .	<i>W. H. Dall</i> . . . . .	731
Catlinite; its Antiquity as a material for Tobacco Pipes. [Illustrated.] . . . .	<i>Edwin A. Barber</i> . . . . .	745
Means of Plant Dispersion . . . . .	<i>E. J. Hill</i> . . . . .	811, 1028
On the Classification of the Linnæan Orders of Orthoptera and Neuroptera . . . . .	<i>A. S. Packard, Jr.</i> . . . .	820
The Power of Scent in the Turkey Vulture . . . . .	<i>Samuel N. Rhoads</i> . . . . .	829
The Siphonophores. (Continued from February number, 1882.) [Illustrated.] . . . .	<i>J. Walter Fewkes</i> . . . . .	833
The Evolutionary Significance of Human Character. . . . .	<i>E. D. Cope</i> . . . . .	907
Observations on the Habits of the American Chameleon ( <i>Anolis principalis</i> ). [Illustrated.] . . . .	<i>R. W. Shelfeldt</i> . . . . .	919
The Variability of Protoplasm . . . . .	<i>Charles Morris</i> . . . . .	926
On the Genealogy of the Insects [Illustrated.] . . . .	<i>A. S. Packard, Jr.</i> . . . .	932
The Mink or Hoosier Frog . . . . .	<i>J. H. Garnier</i> . . . . .	945
Man's Place in Nature. . . . .	<i>W. N. Lockington</i> . . . . .	1003
On the Shells of the Colorado desert and the Region farther East. [Illustrated.] . . . .	<i>Robert E. C. Stearns</i> . . . .	1014
Review of Report C4, Second Geological Survey of Pennsylvania . . . . .	<i>Forsifer Frazer</i> . . . . .	1020
Is the Group Arthropoda a valid one? . . . .	<i>J. S. Kingsley</i> . . . . .	1034
The Serpentine of Staten Island, New York . . . . .	<i>T. Sterry Hunt</i> . . . . .	1037
A Classification of the Natural Sciences. . . . .	<i>T. Sterry Hunt</i> . . . . .	1039
The Pre-Cambrian Rocks of the Alps. . . . .	<i>T. Sterry Hunt</i> . . . . .	1099
The Achenial Hairs of <i>Townsendia</i> . . . . .	<i>G. Macloskie</i> . . . . .	1102
The Hibernacula of Herbs. [Illustrated.] . . . .	<i>Aug. F. Foerste</i> . . . . .	1107
The Hair-sac Mite of the Pig. [Illustrated.] . . . .	<i>R. Ramsay Wright</i> . . . . .	1112
The Geology of Central Australia. [Illustrated.] . . . .	<i>Edward B. Sanger</i> . . . . .	1117
The Number of Segments in the Head of Winged Insects. [Illustrated.] . . . .	<i>A. S. Packard, Jr.</i> . . . .	1134
Development of a Dandelion Flower. [Illustrated.] . . . .	<i>John M. Coulter</i> . . . . .	1211
Notes on the <i>Chaetonotus</i> larus. [Illustrated.] . . . .	<i>C. H. Fernald</i> . . . . .	1217
Notes on the Aborigines of Cooper's Creek, Australia. [Illustrated.] . . . .	<i>Edward B. Sanger</i> . . . . .	1220
Zoological Gardens, a Critical Essay . . . . .	<i>Theodore Link</i> . . . . .	1225
The Copperhead. [Illustrated.] . . . .	<i>Richard E. Kuze</i> . . . . .	1229
Experiments with the Antennæ of Insects. . . . .	<i>C. J. A. Porter</i> . . . . .	1238
On the Position of the Compositæ and Orchideæ in the Natural System . . . . .	<i>Joseph F. James</i> . . . . .	1245
On the Habits of Certain Sunfish. [Illustrated.] . . . .	<i>C. C. Abbott</i> . . . . .	1254

## EDITORS' TABLE.

Unification of geological nomenclature and cartography, 764; The British and American Associations for the Advancement of Science in 1884, 765; Classical vs. Scientific Education, 845; Agnosticism in Science, 955; Questionable Innovations in Nomenclature, 1041; The work of the Mutual Autoptical Society, 1138; The Study of Zoology in the Common Schools, 1139; Government aid to Science, 1258.

## RECENT LITERATURE.

White's Non-marine Fossil Mollusca of North America, 765; Wilder and Gage's Anatomical Technology as applied to the domestic Cat, 768; Recent Books and Pamphlets, 769; Joly's Man before Metals [Illustrated], 848; Second Geological Survey of the Anthracite Coalfields of Pennsylvania, 851; Coues-Stearns' New England Bird Life, 854; Late Works on Evolution, 855; Viallanes' Histology and Development of Insects, 858; Cassino's International Scientists' Directory, 859; Kunckal d'Herculais' Organization and Development of Diptera, 859; Putnam's Solpugidae of North America, 860; Brewer on the American Trotting-horse, 861; Lectures to the Employees of the Baltimore and Ohio Railway, 861; Bulletins of the U. S. Department of Agriculture, 862; Recent Books and Pamphlets, 862; Haeckel's Visit to Ceylon, 956; Wilson's Chapters on Evolution, 958; Jordan and Gilbert's Synopsis of the Fishes of North America, 959; Recent Books and Pamphlets, 961; Weismann's Studies in the Theory of Descent, 1042; Maynard's Manual of Taxidermy, 1046; Saunder's Insects Injurious to Fruits, 1047; Mason's Minute Structure of the Central Nervous System of certain Reptiles and Batrachians, 1047; Recent Books and Pamphlets, 1048; Newcomb and Holden's Briefer Astronomy, 1141; Nature Studies, 1142; Studies from the Biological Laboratory of Johns Hopkins University, 1143; Bulletin of the Illinois State Laboratory of Natural History, 1143; Herrick's Types of Animal Life selected for laboratory use in inland Districts, 1143; Moebius and Heincke's Fishes of the German ocean, 1144; Recent Books and Pamphlets, 1144; Hayden's Twelfth Annual Report of the U. S. Geographical and Geological Survey of the Territories of Wyoming and Idaho [Illustrated], 1260; Brooks' Law of Heredity [Illustrated], 1262; Transactions of the Kansas Academy of Science for 1881-2, 1265; Galton's Human Faculty and its Development, 1265; The Tortugas and Florida Reefs, 1267; Groff's Mineral Analysis, 1268; Recent Books and Pamphlets, 1268.

## GENERAL NOTES.

*Geography and Travels.*—The Arctic Regions, 771; Africa, 773, 863; America, 865; Asia, 866; America, 961; Asia, 962; Africa, 963; Geographical Notes, 964; America, 1049; Asia, 1145; Africa, 1147; America, 1150; Nordenskiöld's Journey of two hundred miles into the Interior of Greenland, 1151; Geographical Notes, 1151; The Dutch Circumpolar Expedition, 1269; Africa, 1269.

*Geology and Palæontology.*—The Structure and Appearance of a Laramie Dinosaurian [Illustrated], 774; A new Edentate, 778; Geological News, 778; A new Pliocene formation in the Snake River valley, 867; The "Third Trochanter" of the Dinosaurs, 869; The Puerco Fauna in France, 869; Geology of Lower Merion and Vicinity, 965; Hulke on Ichthyosaurus and Plesiosaurus, 967; Some new Mammalia of the Puerco Formation, 968; Geological Notes, 968; Mr. Rand on the Geological Survey of Chester and Delaware counties, Penna., 1052; Atmospheric Dust and Disease Germs, 1053; The Progress of the Ungulates in Tertiary time, 1055; Geological Notes, 1057; A new Chondrosteian from the Eocene, 1152; The Carson Footprints, 1153; The Quaternary Beds at Billancourt, Paris, 1153; The Java Upheaval, 1154; Discovery of Palæozoic Rocks in Western Brazil, 1156; Geological Notes, 1157; M. Jules Marcou on the Geology of California, 1271; The Cranium of Iguanodon, 1273; Discovery of Tracks in the Jura-triassic of Colorado, 1274; Locomotive Appendages of Trilobites [Illustrated], 1275; Geological Notes, 1277.

*Mineralogy.*—Scovillite, a new mineral, 779; The Artificial formation of Minerals and Rocks, 780; Concretions in Meteorites, 781; Mineralogical Notes, 781; Empholite, a new Mineral, 870; The Cornwall Tin ores, 871; The Minerals of Skye, 872; Mineralogical Notes, 872; The Influence of Light on Minerals, 1058; Rutile in Phlogopite, 1058; A new use for Strontianite and Celestite, 1059; "Sulfuraires," 1059; Chladnite, 1059; New Minerals, 1060; Mineralogical Notes, 1060; Experimental Studies upon Rocks, 1158; Stibnite from Japan, 1159; A beautiful Crystal of Apatite, 1160; Precious Iolite from Brazil, 1160; Separation of Minerals according to the degree of Cohesion, 1161; Lithiophilite, 1161; Some recently formed Minerals, 1161; Pyrites for sulphuric acid, 1162; Picranalcime, 1162; Mineralogical Notes, 1162; Minerals of the Cryolite group from Colorado, 1278; The Uranium Minerals, 1278; Minerals from Lehigh and Berks counties, Pa., 1279; Mineralogical Notes, 1279.

*Botany.*—Notes on the study of Fungi, 782; Analysis of Vegetable Tissues, 785; A Chinese Gymnocladus, 787; Botanical Notes, 787; Ellis' North American Fungi, 873; Nectar in Sper-

mogonia, 874; Botany at the Minneapolis meeting of the A. A. A. S., 874; *Equisetum arvense* L., var. *serotinum* Meyer, 875; New Plants from California and Nevada, etc., I, 875; Better Methods of Teaching Botany, 876; Botanical Notes, 877; The Growth of Plants in Acid Solutions, I, 970; Tuckahoe, 972; New Plants from California and Nevada, etc. II, 973; Botanical Notes, 974; The Growth of Plants in Acid Solutions. II, 1061; Revision of the North American *Trifolii*, 1063; Large Fungi, 1064; Revision of the genus *Clematis* of the United States, 1065; The Botanical Club of the A. A. A. S., 1065; Professor P. A. Saccardo's *Sylloge Fungorum Omnium hucusque cognitorum*, 1066; Bentham and Hooker's *Genera Plantarum*, 1066; Botanical Notes, 1067; Watson's Contributions to American Botany, XI, 1163; A Hybrid Moss, 1164; Projectile Force in *Æcidium*, 1164; New Species of North American Fungi, 1164; A Study of The Survival of the Fittest, 1166; Popular Botany, 1167; Botanical Notes, 1168; A new Species of Insect-destroying Fungus, 1280; Notes on *Gymnosporangium* and *Roestelia*, 1281; The Structure of the Cell-wall in the Cotyledonary Starch-cells of the Lima Bean [Illustrated], 1282; New Florida Fungi, I, 1283; Botanical Notes, 1285.

*Entomology*.—A unique and beautiful Noctuid [Illustrated], 788; Insects affecting stored Rice, 790; Hypermetamorphoses of the Meloidæ, 790; Color preferences in nocturnal Lepidoptera, 791; Entomological Notes, 792; Caprification, 877; Migrations of Gall-making Plant-lice, 879; *Samia cynthia* feeding on the Sassafras and Tulip tree, 879; Lichtenstein's Nomenclature of the various Phases presented in the Life-history of the Aphididæ, 879; The old, old question of Species, 975; Myrmecophila, 975; Salt-water Insects used as Food, 976; Alternation of generation in Aphididæ, 977; Food-plants of *Samia cynthia*, 977; Bitten by an Aphid? 977; Injury done by *Colaspis tristis*, 978; *Steganoptycha claypoleana*, 978; Entomology at Minneapolis, 1068; Enemies of the Egg-plant, 1070; The Periodical Cicada in Southeastern Massachusetts, 1070; Habits of *Murmidius*, 1071; Obituary, 1072; Entomological Notes, 1072; Economic Notes, 1073; Entomology at Minneapolis, 1160; Insects as Food for Man, 1174; Occurrence of *Junonia cœnia* at Natick, Mass., 1174; The Colorado Potato-beetle, 1174; Rare Monstrosities, 1175; The Nervous System of Insects, 1175; *Hymenorus rufipes* as a myrmecophilous species, 1176; Migration of Plant-lice, 1176; Recent Publications, 1177; Entomological Notes, 1177; An Epidemic Disease of *Caloptenus* differentialis, 1286; Occurrence of a Stratiomys Larva in Sea-water, 1287; Some recent Discoveries in reference to Phylloxera, 1288; Coleoptera infesting Prickly Ash, 1288; The Growth of Insect Eggs, 1289; Protective device employed by a *Glaucopid* Caterpillar, 1289; Saw-fly Larvæ on the Quince, 1289; Entomology in New York, 1289; Fruit Insects in California, 1291; Death of Dr. J. L. LeConte, 1291; Entomological Notes, 1291; Economic Notes, 1292.

*Zoology*.—The Sea-Pens, or Pennatulida, 793; Heterogenetic Development in Diaptomus, etc., Corrections, 794; The Coxal Glands of Arachnida and Crustacea, 795; Submetamorphoses of Fishes, 797; The Osteological Characters of the genus *Histiophoca*, 798; The Breeding Place of the little Auk [Illustrated], 798; Zoological Notes, 798a; Note on a *Peripatus* from the Isthmus of Panama [Illustrated], 881; The Structure and Embryology of *Peripatus*, 882; The Development of *Renilla*, 884; A new Parasitic Copepod Crustacean [Illustrated], 885; Zoology at the Naples Station, 887; The Electric Organs of the Torpedo, 887; King-birds, *Tyrannus intrepidus*, feeding their young upon Fruit, 887; Characteristics of Women, 888; Zoological Notes, 889; New Observations on Hydra, 978; Kunster on the Flagellata, 979; Mode of Application of the Suckers of the Leech, 980; The Development of Ascidians, 980; The Food of the Crayfish, 980; The Bottle-nose Whale, 981; A Squealing Toad, 982; The Spurs and Claws of Birds' Wings, 982; Hibernation of the Spotted Gopher, 983; Zoological Notes, 983; Hæmatozoa of Fishes, 1074; External Parasite of the Trout, 1075; New Porto Rico Land Shells, 1075; Molting of the Apodemes in Crustacea, 1075; Molting of the Shell in *Limulus*, 1075; Crustacea of the New England coast, especially of the Gulf Stream slope, 1076; Protective Coloration in Phrynosomæ, 1077; The Gardener Bird (*Amblyornis inornata*), 1078; Tengmalm's Owl, 1078; White Beavers, 1079; Zoological Notes, 1079; The Deep-sea Fauna, 1179; *Vampyrella heiloproteus*, a new Moneron, 1182; Dimorphism of Foraminifera, 1182; Nematophores of the Hydroida, 1182; "Challenger" Holothuroidea, 1183; A new *Unio* from Florida, 1184; New Land Shells from Tennessee, 1184; The Fresh-water Shells of Cooper's creek, Central Australia [Illustrated], 1184; Note on the occurrence of two genera of Branchiopoda in the Australian desert, 1185; Prairie Rattlesnake, 1186; Short-eared Owl, 1186; Habits of the Panther in California, 1188; Zoological Notes, 1190; A new Virgularian Actinozoan, 1292; Our Fresh-water Sponges [Illustrated], 1293; *Pyrgula nevadensis*, 1296; Sexual Characters of *Limulus* [Illustrated], 1297; A new Snake from New Mexico, 1300; Habits of the Aye-aye, 1301; Zoological Notes, 1301.

*Physiology*.—Locomotor System of Medusæ, 891; The Origin of Fat in the Body, 391; The Formation of Milk, 892; Interaction of the Spinal Nerve Roots, 892; Chemical Difference of Living and Dead Matter, 892; Nutrition of the Frog's Heart, 892; Effect of prolonged Hunger upon the Blood Corpuscles, 893; Study of the Physiology of the Kidney by Measurements of its Change of Volume, 1081; The Action of Ethyl Alcohol upon the Dog's Heart, 1082; Relation of Arterial Pressure to the Duration of the Systole and Diastole of the Heart-beat, 1083; The Excitation of the Vaso-motor Centers by Induction Shocks, 1193; The Function of the Spleen, 1194; The Tubercle-bacillus, 1195; The Function of the Cochlea, 1195; The new Corpuscle of the Blood and its relation to Coagulation, 1303; Digestion of Meats and Milk, 1305; Animal Chlorophyll, 1305.

*Psychology*.—Gluttony in a Frog, 800; Activity of the Senses in new-born Infants, 801; The English Sparrow in Canada, 834; Instinct or Reasoning Powers in the Horse, 895; How Snakes approach and swallow their Prey, 896; Battle of Ravens, 897; Reasoning Powers in the Cat, 986; An Elephant's Revenge, 987; Intelligence of the Horse, 1084; Exhibition of the same Intelligence in an Ox, 1084; Adoption by a Cat of five young Rats, 1084; Habits of the Beaver, 1196; The Striped Squirrel "playing 'possum," 1198; The English Sparrow "playing 'possum," 1199; Sense of Direction in Animals, 1199; The Intelligence of the American Turret Spider, 1305; Notes on a Happy Family, 1306; Gallant Conduct of a Robin, 1307.

*Anthropology*.—The growth of Children, 801; The American Antiquarian, 802; The Pipe of Peace, 803; Comparative and Philosophical Researches into the characters of the Cranium and Brain, 833; In Memoriam, 835; The Society of Americanists, 897; The Societe d'Ethnographie, 898; Folk Lore, 898; Anthropological Society of Lyons, 899; The Trenton Gravels, 899; Lectures on Anthropology, 899; The Charnay Collection in Washington, 987; The Philippine Islanders, 989; Shell Ornaments and Pipestone, 990; Bertillon's "Savage Races," 990; The American Autochthones, 991; The Archaeological Institute, 1085; The Charnay Collection, 1085; Revue d'Ethnographie, 1086; Anthropology in France, 1087; The American Antiquarian Society, 1087; Hittites in America, 1088; Anthropology at the American Association, 1199; Wisconsin Historical Collections, 1202; Iron from Ohio Mounds, 1203; Human Proportion, 1204; Indian Archæology, 1308; Notation of Kinship, 1309; German Anthropology, 1310; The Origin of Invention, 1310.

*Microscopy*.—Frenzel's Method of fixing Sections on the Slide, 805; The Hertwigs' Macerating Fluid, 806; Rose bengale in combination with Iodine Green and Bleu de Lyon, 900; Double Staining with Aniline Dyes, 901; Threlfall's Method of Fixing Sections, 903; Thoma's Sliding Microtome [Illustrated], 992; Thoma's Sliding Microtome, Imbedding Methods [Illustrated], 1089; Treatment of Pelagic Fish Eggs, 1204; Motor Nerve Ending, 1205; Recent Improvements in Section-cutting [Illustrated], 1311; The Section-smoother devised by Mayer, Andres and Giesbrecht, 1312; The Registering Micrometer-screw, 1313; The new Object-holder, 1314; An Improvement in the Carriers, 1315; Type-metal Boxes for Imbedding, 1316.

SCIENTIFIC NEWS, 807, 903, 998, 1093, 1206, 1318.

#### PROCEEDINGS OF SCIENTIFIC SOCIETIES.

Biological Society of Washington, 810; New York Academy of Sciences, 810; Boston Society of Natural History, 810; Appalachian Mountain Club, 810; Philadelphia Academy of Natural Sciences, 905; New York Academy of Sciences, 906; Philadelphia Academy of Natural Sciences, 1000; American Association for the Advancement of Science, 1093; Boston Society of Natural History, 1208; New York Academy of Sciences, 1208; Sitzungsbericht der Gesellschaft naturforschender Freunde zu Berlin, 1208; Biological Society of Washington, 1318; New York Academy of Sciences, 1318; Boston Society of Natural History, 1319; Academy of Natural Sciences, Philadelphia, 1319; American Philosophical Society, 1322; National Academy of Sciences, New Haven, 1322.
